

Norton Activation and Registration Instructions

WARNING!!! DO NOT USE A SEARCH ENGINE TO FIND THE NORTON WEB PAGE, THERE ARE MANY BOGUS COPYCAT WEBSITES OUT THERE!

Always go directly to the Genuine Norton website using the address bar at the top of your browser!

<https://norton.com/setup>

Norton Installation Instructions: -

1. Click and Visit the above web address on a web browser (Chrome, Edge etc. NOT Brave though)
2. Click on "Returning user? Sign in" (if you already have a Norton Account).
3. Sign in to your Norton Account or Create a new Account if a new user
4. Select "ENTER A NEW PRODUCT KEY" from the GET STARTED Page
5. Enter the 25 Digit Product Key provided
6. Enter your Billing Information to Activate your Subscription and Annual Automatic Renewal Authorization*
7. Follow the on-screen instructions to download and install (if using for Renewal see note below)

*Please Note: If the old and new product version are the same, you generally do not need to reinstall the software again, as your software updates throughout the year, so you only need to reinstall if the software hasn't updated automatically. Your new activated subscription may auto sync with your installed software at the end of you current subscription. If not, please see below additional instructions how to manually sync the new subscription to your installed software.

**Option to unsubscribe from Auto-Renewal with Norton at any time from within your Norton online Account.

IMPORTANT INFORMATION: Norton has changed the way keys are activated -

PRE-PAID SUBSCRIPTION WITH ENROLLMENT AND ACTIVATION ONLINE:

A payment method (Debit/Credit Card or PayPal) must be saved in your Norton account to activate and use. You will not be charged anything until the prepaid terms ends.

SUBSCRIPTION WITH AUTOMATIC RENEWAL:

No service disruption since this subscription automatically renews. If you do not wish to renew directly with Norton, you can cancel automatic renewal in your Norton online account at any time.

Additional Information -

You can only activate a key ONCE after that everything is managed from within your Norton online Account. If you try to activate again, you will see the message "Invalid Key".

We always recommend waiting to activate your new key until the last day of your current subscription to save the possibility of losing any remaining days!

There is no time limit for activating the Keys we supply; the subscription starts once the key is activated.

To update your already installed software with your new activated and registered subscription key -
Make sure you have already activated and registered the New Key to your Norton account before following the below -

- Make sure the already installed Norton software is signed into your Norton Account
- To update your current Norton product, you need to enter the key into your already installed software
- Open the Norton software
- Click the small Circle in the top right corner, it may have a Letter in it.
- Click the Serial Number option from the Menu
- Then Click the 'Enter a Key' button that shows
- Communicating with the Norton Server will show
- You will be asked to enter your New Product Key, enter the newly activated key, and then click next, this will apply your new subscription to your installed software.
